

TITLE: TEST STROOP UMH-MEMTRAIN

DESCRIPTION OF THE TECHNOLOGY

App for Android that incorporates the three phases of the Stroop test in equivalence to the original format and collects as results the reaction times of each attempt as well as the successes and failures.

The Stroop test is a test of words and colors where the subject's reaction time and ability to inhibit automatic responses are tested

MARKET APPLICATION SECTORS

Tool in an European intervention of healthy aging.

TECHNICAL ADVANTAGES AND BUSINESS BENEFITS

There are several applications with similar format but all of them lack the phases and structure of the test in its original format that is used in the scientific literature.

This app allows you to download the information collected directly, to be used in Excel format, which facilitates investigations with this instrument.

CURRENT STATE OF DEVELOPMENT

The APP is developed fully in Spanish and in development in English, Polish, Czech, Slovenian

INTELLECTUAL PROPERTY RIGHTS

It is registered before the Intellectual Property Registry with number 09/2018/656
